Profile

A motivated Full Stack Developer with hands-on experience in building responsive web applications using **ReactJS, NextJS, NodeJS, and MongoDB**. Skilled in frontend frameworks, component-based architecture, and backend integration. Experienced in team-based software development through internships and junior developer roles. Strong problem-solving skills, communication, and eagerness to learn modern tools like **CI/CD, Docker, and cloud platforms**. Seeking a Fresher Full Stack Developer role to apply skills and grow into mid-level responsibilities.

Experienced in building production-ready UIs using React, Next.js, and Tailwind CSS. Skilled in converting Figma designs into responsive, reusable components and integrating frontend with REST APIs. Comfortable working independently in fast-paced startup environments and iterating quickly based on feedback.

Professional Experience

01/2025 – present
Kathmandu, Nepal

Junior Software Developer

Monal Tech Pvt. Ltd

- Designed and developed frontend applications using HTML, CSS, JS.
- Contributed in building the frontend of a web vulnerability scanner.
- Converted UI mockups into responsive, production-ready layouts using React and Tailwind CSS.
- Built reusable components and improved frontend code structure for maintainability.
- Collaborated closely with backend developers to integrate REST API endpoints.

11/2024 – 01/2025
Kathmandu, Nepal

Software Development Intern

Monal Tech Pvt. Ltd

- Contributed to the design and development of responsive web applications through team collaboration
- Designed and built static web pages using modern design principles
- Implemented design updates from Figma and ensured consistency across components.

02/2024 – 04/2024
Kathmandu, Nepal

Intern

Deerwalk Training Center

- Gained exposure to organizational workflows and improved communication skills.
- Followed up with potential marketing leads and handled documentation.

Projects

MakeMyScan.com

Website Vulnerability Scanner

- Developed a full-stack application using NextJS, Django and PostgreSQL.
- Built the front-end using NextJS with fully responsive pages and reusable components.
- Converted wire frames/UI designs into clean, scalable production-ready screens.

- Implemented responsive UI components, API integration, and optimized for performance.
- Demonstrated security-focused development with real-world application use cases.

Rondesse.com

WordPress Site Enhancements

- Enhanced an existing WordPress website built with Elementor, adding and customizing UI components.
- Integrated and configured Contact Form to improve user interaction and lead collection.
- Optimized site performance, responsiveness, and ensured smooth cross-device functionality.

Portfolio

Personal Portfolio Website Design

- Built a responsive portfolio site using NextJS, Tailwind, and TypeScript.
- Showcased projects, technical skills, and achievements in a modern, mobile-friendly layout.
- Deployed on GitHub Pages/Netlify with version control via Git.

Education

Kathmandu, Nepal	Sagarmatha Engineering College <i>Bachelor in Electronics, Communication and Information Engineering</i>
Kathmandu, Nepal	Trinity International College <i>+2 Science</i>

Technical Skills

Frontend

HTML5, CSS3, JavaScript (ES6+), TypeScript, ReactJS, NextJS, Tailwind CSS, Bootstrap

Backend

NodeJS, ExpressJS, RESTful APIs, Basic Authentication & Authorization

Databases

MongoDB (NoSQL), MsSQL (Basic Query)

Version Control & Tools

Git, GitHub

DevOps & Deployment

- GitHub Pages, Netlify, Vercel
- Familiar with Docker & GitHub Actions (learning)

Other

WordPress, Flutter

Soft Skills

Communication

Problem Solving

Team Collaboration

Conflict Handling

Languages

- Nepali
- English
- Hindi

Certificates

- Completion of Flutter Training Program

Awards

Project Category Winner
Orbit Engineering Expo 2022

Project Category Winner
Delta 3.0 Engineering Expo 2022
